

New PACE Skeleton Street or Track

The new PACE Skeleton is a exoskeleton based kit that brings true go-kart like performance to the masses. Simple, elegant, no compromise, open driving for street & track. It is a modern interpretation of the classic Clubman / Lotus 7 theme. With an aluminium chassis & Chev V8 drivetrain, power to weight ratio is insane. Awesome Track Weapon and Spec'd, designed and approved for Australian road use.

FEATURES

- Performance will impress. Our previous versions have been proven on both street & track, this new incarnation is an exciting new level of offering.
- For the first time with an innovative all aluminium exoskeleton chassis that features both light weight, enhanced rigidity and superior safety. Constructed using our top of the line Pulse TIG welding machines and our full rotisserie chassis jigs. Nothing performs or looks better than an all aluminium chassis. Combined with CNC billet suspension design, precision construction, full size wheel base, light weight and engine options that can deliver virtually limitless performance.
- Engine fitment is quick & simple as the kit is provided with engine mounting plates, Polyurethane engine mounts and cv joint drive shafts & stub axles to suit an all aluminium GM V8 engine.
- Body quality is industry leading. Body panels are supplied with a high quality gloss gelcoat finish in your choice of colour.
- Race options are available: DigiDash2 Pro+ upgrade, QA1 Double Adjustable Shocks, Race Front Wing etc. We also build and supply complete turnkey track only vehicles.
- Security & Safety is provided by design. Due to the exoskeletal design, the chassis features superior front, side & rear protection. The chassis also features integrated roll hoops with rear stays. Other safety features include collapsible steering column, centralised fuel tank, over-sized brakes & cooling system remaining at the rear (outside the cockpit).
- Quick to Build. The kit is design and supplied with mounting brackets and virtually all parts required to complete the vehicle. Just add engine package and some miscellaneous parts.

KIT SPECIFICATIONS

PACE Skeleton Kit Specs At A Glance	Starter	Track	Street
	\$24,995	\$37,995	\$44,995
ExoSkeletal Chassis Design:			
Aluminium Tubular construction with integral floor, bulkhead and firewall, Integrated Roll Hoops and removable Roll Hoop Stays.			
Suspension Arms:			
CNC Billet Aluminium Front Suspension Arms, Chrome Moly Rear Suspension Arms, CNC Billet suspension uprights, Designed for Rod Ends, Extensive Adjustability.			
Body Panels:			
Front Nose Cone, Side Pods, Engine Cover with Air Scoop, Rear Tail & Diffuser			
After Sales Support:			
Full colour build manual with DVD. Phone and email support for both build and street registration support. In person visits to talk to our staff more than welcome.
